**About Metals One**

Metals One is developing strategic metals projects in Finland (Black Schist Project) and Norway (Råna Project), with approximately £9 million of exploration carry exposure through a farm-in agreement. Metals One is aiming to help meet the significant demand for strategic minerals by defining resources on the doorstep of Europe's major electric vehicle OEMs and battery manufacturers. Metals One's Black Schist Project in Finland, totalling 706 km<sup>2</sup> across three licence areas, has a total Inferred Resource of 57.1 Mt nickel-copper-cobalt-zinc and is located adjacent to one of Europe's largest strategic minerals producers, Terrafame. Metals One's fully carried Råna Project in Norway covers 18.14 km<sup>2</sup> across three contiguous exploration licences, with significant opportunity for exploration of the Råna intrusion, and proven potential for massive sulphide nickel-cobalt-copper mineralisation.
