

Diaceutics - Expansion of US Commercial Activities

Belfast and London, 28 November 2024 - Diaceutics PLC (AIM: DXRX), a leading technology and solutions provider to the pharma and biotech industry, is pleased to provide an update to the scaling of its US commercial activities strategy. A commercial data partnership agreement was executed in H1 2024, and a further four agreements were executed in H2 2024 to date, with a total contract value in the first year of £1.13 million (\$1.48 million). The commercial data partnership contracts already underway are contributing to revenue in 2024 and Annual Recurring Revenue (ARR) growth.

Commercial data partnerships expand Diaceutics' US commercial reach through marketplaces and leverage partner sales teams in a co-selling model. The directors believe these contracts will further scale the company's commercial reach through the selling of high-margin data products, such as DXRX Signal, to a broader customer base, both in terms of new customer segments and pharmaceutical brands.

Ryan Keeling, Chief Executive Officer of Diaceutics, commented: *"We are really excited by these new agreements and the ability to offer our DXRX platform to a much wider audience and, in the process, grow and scale our market opportunity. We are pleased to see these partnerships contributing revenue and ARR ahead of plan in 2024".*
