-

## **Section 1 - Conflict Minerals Disclosure**

### ***Item 1.01 Conflict Minerals Disclosure and Report***

Pursuant to Rule 13p-1 under the Securities Exchange Act of 1934, Dauch Corporation (the "Company" or "Dauch"), we are filing our Conflict Minerals Report as Exhibit 1.01 to this Specialized Disclosure Form on Form SD. Our Conflict Minerals Report is also available on our website at [www.aam.com/suppliers/doing-business-with-aam/conflict\\_minerals](http://www.aam.com/suppliers/doing-business-with-aam/conflict_minerals). Information on our website or accessed through it are not incorporated by reference into this Form SD.

### ***Item 1.02 Exhibit***

A copy of Dauch's Conflict Minerals Report for the year ended December 31, 2025 is filed as Exhibit 1.01 to this Form SD.

## **Section 2 - Exhibits**

### ***Item 2.01 Exhibits***

[Exhibit 1.01 Conflict Minerals Report](#) for the year ended December 31, 2025.

---

## SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

### **Dauch Corporation**

Date: May 29, 2026

By: /s/ Kristen M. Netschke

Name: Kristen M. Netschke

Title: Assistant Secretary

**DAUCH CORPORATION  
CONFLICT MINERALS REPORT**

Year End December 31, 2025

**Introduction**

This document, constituting Exhibit 1.01 to Form SD of Dauch Corporation and its subsidiaries (collectively, the “Company” or “Dauch”), for calendar year 2025, is the Company’s Conflict Minerals Report (“CMR”) in accordance with Rule 13p-1 under the Securities Exchange Act of 1934.

Dauch is an SEC Issuer, as described in the US Securities and Exchange Commission (“SEC”) Final Rule (the “Rule”) 17 C.F.R. § 240 and 249(b), and is subject to the provisions of Section 1502 of the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“DF1502”) that address the sourcing of Conflict Minerals from the Democratic Republic of the Congo (“DRC”) and its adjoining countries (“Covered Countries”) that are necessary to the functionality or production of products that the Companies manufactured or contracted to manufacture.

Conflict Minerals are defined by the Rule to include cassiterite, columbite-tantalite, gold, wolframite, and their derivatives. The subject minerals are more commonly known as tin, tantalum, gold, and tungsten, respectively (“3TG”).

As such, this report covers the reporting period January 1, 2025 through December 31, 2025 (“Reporting Year 2025”, “RY2025”) related to the Conflict Minerals that are necessary to the functionality or production of products that the Company manufactured or contracted to manufacture and includes a description of the measures taken by the Company to exercise due diligence on the source and chain of custody of the subject minerals.

The content of any website referred to in this report is included for general information only and is not incorporated by reference to this report.

**Section (1) Due Diligence**

The Company’s comprehensive Conflict Minerals Program includes a due diligence process that was designed to conform, in all material respects, to the criteria set forth in the internationally recognized Organization for Economic Co-operation and Development (“OECD”) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High-Risk Areas, 3rd Edition and related Supplements on Tin, Tantalum and Tungsten and on Gold (“OECD Guidance”).

The following is a review of the actions comprising the OECD Guidance five-step framework that the Company took to implement our due diligence process:

1. Establish strong company management systems

- a. The Company developed and adopted a Responsible Minerals Sourcing Policy and made it publicly available at [www.aam.com/conflictmineralsstatement](http://www.aam.com/conflictmineralsstatement).
- b. The Company structured internal management to support supply chain due diligence by identifying a cross-functional team (the "Team"), consisting of representatives from Global Procurement, Engineering, Finance, and Legal.
- c. The Company established a system of controls over the supply chain by leveraging the iPoint Conflict Minerals Platform to monitor all relevant data.
- d. The Company also provided feedback and engagement recommendations to suppliers that declared potential smelters or refiners in their supply chains.
- e. The [conflictminerals@aam.com](mailto:conflictminerals@aam.com) mailbox is a mechanism available for any interested stakeholder to communicate their concerns/grievances regarding Dauch's Conflict Minerals process. Each supplier contacted is advised of the existence of this mailbox as a point of contact for questions or concerns. Other stakeholders are made aware of this mailbox as a result of previous CMR filings.

2. Identify and assess risk in the supply chain

- a. The Company identified risk in the supply chain by first identifying direct material suppliers to whom payment were made in 2025.
- b. Suppliers with low annual spend profiles were then deemed out-of-scope in order to focus our resources on improved compliance from our more substantial direct material suppliers.
- c. After identification of the potentially at-risk supplies, the Reasonable Country of Origin Inquiry ("RCOI") and corresponding due diligence were to be conducted.

3. Design and implement a strategy to respond to risks

- a. The Company devised and implemented a risk-management strategy that included, but is not limited to:
  - i. Requesting additional information from suppliers that provided incomplete or contradictory data responses
  - ii. Requiring CMRT version 6 or above to capture new information regarding Conflict-Affected and High-Risk Areas ("CAHRAs")
  - iii. Confirming the accuracy of identified smelters or refiners from suppliers
- b. As a member of the Responsible Minerals Initiative ("RMI") our risk mitigation processes related to facilities that smelt, refine and/or process the subject raw materials are in place and consistently reviewed, as demonstrated by the Responsible Minerals Assurance Process ("RMAP").

4. Support the development and implementation of independent third-party audits of smelters' and refiners' sourcing

- a. The Company is a member of the RMI, which conducts independent third-party audits of smelters on behalf of its members. The Company utilizes the RCOI information provided to members of the RMI to determine the possible country of origin of the Conflict Minerals necessary for the functionality or production of its products.

5. Report on supply chain due diligence

- a. The Company reports annually to the SEC on Form SD.
- b. The Company makes its Conflict Minerals Report publicly available at <https://www.aam.com/suppliers/doing-business-with-aam/conflict-minerals>.

Steps taken and being taken to mitigate risk, and to improve due diligence:

The Company has taken a number of steps to (i) mitigate the risk that its necessary Conflict Minerals benefit armed groups in the DRC and/or Covered Countries and (ii) to improve its due diligence. Those steps include, but are not limited to:

- a. Updating our Policy to reflect evolution in the program to also include CAHRAs
- b. Focus of resources on risk-based due diligence, as discussed in the OECD Due Diligence Guidance[1]
- c. Continue to invest in cross-industry collaboration via the Responsible Minerals Initiative
- d. Improve reporting transparency by including the list of possible countries, to the greatest possible specificity, where the subject minerals in our products may have originated

(1) Product Description:

The Company has determined, in good faith, that the applicable product categories are the following:

- a. Driveline products
- b. Metal Formed products

*Driveline products* consist primarily of front and rear axles, driveshafts, differential assemblies, clutch modules, balance shaft systems, disconnecting driveline technology, and electric and hybrid driveline products and systems for light trucks, SUVs, CUVs, passenger cars and commercial vehicles.

*Metal Formed products* consist primarily of axle and transmission shafts, ring and pinion gears, differential gears and assemblies, connecting rods and variable valve timing products for OEMs and Tier 1 automotive suppliers.

(2) Product Determination:

Pursuant to guidance issued by the SEC Division of Corporation Finance on April 29, 2014, we are not required to describe any of our products as “DRC Conflict Free,” as having “not been found to be ‘DRC Conflict Free’” or as “DRC Conflict Undeterminable.” Moreover, since we have not voluntarily elected to describe any of our products as DRC Conflict Free, the requirement for an independent private sector audit of this report is not applicable.

Results of our RCOI and Due Diligence Measures:

Table 1 and Table 2 reflect the result of our RCOI and due diligence for the 3T’s and Gold, respectively. The countries listed in Tables 1 and 2 are potential sources of origin of the conflict minerals necessary for the functionality or manufacture of the products identified above in

“Product Description,” according to the country of origin information available to us as RMI members. The smelters and refiners as defined by the SEC Final Ruling section II(A)(3) declared by our supply chain can be found in [Table 3](#).
